Compatibility

WireView PRO II

This list shows graphics cards that have been visually or physically validated by Thermal Grizzly. The display on the WireView Pro II can be rotated by 180° in the settings.

- WireView Pro II Normal: For the listed graphics cards, the "N" variant is required to route the power cable downward. If the graphics cards are used with the "R" variant, the power cable is routed upward.
- WireView Pro II Reversed: For the listed graphics cards, the "R" variant is required to route the power cable downward. If the graphics cards are used with the "N" variant, the power cable is routed upward.

If a graphics card model is not listed, the support team can be contacted. **support@thermal-grizzly.com**

Additionally, the technical drawing in the download section of the product page should be carefully reviewed to compare all dimensions and clearances in advance and to ensure that the WireView Pro II can be installed in the system. Please note that large CPU tower coolers, for example, may negatively affect compatibility.

WireView Pro II Normal

RTX 5090:
- Gainward GeForce RTX 5090 Phantom
- Gainward GeForce RTX 5090 Phantom GS
- INNO3D GeForce RTX 5090 X3
- INNO3D GeForce RTX 5090 X3 OC
- INNO3D GeForce RTX 5090 iCHILL X3
